

>> Advantages of Chain Reaction Agent / GPL-37 = Our formulation is your solution <<

1. It is an indispensable growth promoter for lawn transplanting and planting. Turf preservation and life extension. It has a very strong effect of promoting root growth.
2. Environment & ecology friendly.
3. Enhances mineral absorption & increases plant nutrient content.
4. Aids in photosynthesis process
5. Stimulates plant's metabolism to speed growth.
6. Enhances germination of plant seeds, increases flower and fruit setting.
7. Insures top quality crops of desirable size.
8. Absorption of nutrients in the shortest time.
9. Improves water absorption and allow better uptake of natural soil mineral.
10. Improves root development and strengthen it. Increases root respiration.
11. Earlier maturing and harvesting time.
12. Higher levels of tolerance to stress.
13. Increases & activates good soil micro-organism
14. Improve soil aeration, water permeability and soil aggregate.
15. Increases water holding capacity.
16. Stabilizes the acidity of soil and reduce toxicity.
17. Releases "locked up" nutrients.
18. Restores depleted soil & maintains ecosystem
19. Avoids nutrient antagonism that prevents nutrient uptake through the soil.
20. Advance in technology, protein & organic nutrient based in liquid form.
21. Most economical plant fertilizer in the market.
22. Decrease in the uses of compound fertilizer by up to 50% to 70%.
23. Does not bleach.
24. Increases crop yield by up to 20% to 200%.
25. Stimulates plant's respiratory system.
26. Solution for plant's system blockage.
27. Lodging resistance.
28. Increases water holding capacity.
29. Prevent the decay of roots and new roots stimulating
30. Drought protection.
