

**Amazing efficacy to Turf, Flowers, Landscaping, Horticulture, Perennial crops, Cash crops, Food crops, etc. for NATURAL FERTILIZERS and NATURAL PESTICIDES & SOIL IMPROVER**

We take pleasure in inviting your interest.

===== **CHAMPION FERTILIZER** ===== **DISTRIBUTOR WANTED** =====  
AQIS Permit No. IP11008205 (Australian Government, Department of Agriculture, Fisheries and Forestry)  
U.K. Registration License - OF&G Regn No.UKE0540 (**Brand: Enhance Organic Stimulant**)

Dear Madams / Sirs,

### **Our Business Climate is Changing Quickly Don't Let Your Competitors Get Ahead**

=====

The world of crop protection and stimulants is changing at a rapid pace. Consolidation is forcing companies across the globe to re-evaluate their business strategies. We will allow you to strategize with our sales team.

You will have access to some of the most progressive & effective with a wide portfolio of products to help you navigate the new market climate in which we must operate. Don't get left behind – attend our sales team now it is a good timing.

The **NATURAL FERTILIZERS & NATURAL PESTICIDES** will be instead of chemical toxically pesticides, this situation is ongoing progress in the worldwide markets. This trend will soon pervade the global agricultural market, and "chemical pesticides" will soon be replaced by "The plant protection material of NATURAL PESTICIDES". **Only early birds, can have insects to eat, and the initiate pioneers will always be the winner of a highly competitive agricultural market operators.**

### **Now, what can invest?**

**Efficient and effective use of fertilizers has become more essential than ever.**  
The world's population is expected to rise from today's 7.2 billion to over 9 billion by 2050, and an increasing number of people will live in densely-populated urban areas. As incomes in emerging nations rise, more meat is consumed and thus more grain to feed livestock must be produced. Bio-fuels are also generating demand for increased yields. Because there is limited space for agricultural expansion, yields must be optimized. At the same time, there is in developed nations a heightened environmental awareness of the need to promote fertilizers with low carbon footprints, to maintain healthy soil environments, and reduce run-off from fields.

Because the financial turmoil and economic downturn. **Agricultural crops are bad harvests and abnormal climate.** What is up? The salaries do not increase, pockets of discontent. Business failures, unemployment has been rising, low productivity, an aging population, as well as the aftermath of the global financial crisis, etc., will also slow down global economic growth.

**It is better to rescue by themselves instead of waiting for a government bailout.**

**Help us to help you!**

## One stop solution across the crop growth!

Here is what you can expect: (The perfect combination of HOMERUN)

=LINK-SOIL is improved quality from land, the pH adjustment, gives plants the best growing environment. = Wasteland into fertile fields = GERMINATION treatment of SEEDS, use LINK-SOIL to soak seeds.

=Be coupled with the use the best systemic nutritional stimulant / NATURAL

FERTILIZER\$ - GPL-37 Chain Reaction Agent, Link-ROOT & Link-FLORA & Link-N.N. in order to achieve the rapid growth of the plants. For overheating, too cold, drought, long period of rain, strong winds, flooding, soil fertility disappear, improper fertilization (such as ammonia fertilizer overdose) may help crops resistant to promote its recovery growth, enhance disease resistance of crops.

Amazing efficacy to Turf, Flowers, Landscaping, Horticulture for NATURAL FERTILIZER\$ & SOIL Conditioner.

It is an indispensable growth promoter for lawn transplanting and planting, turf preservation and life extension. It has a very strong effect of promoting root growth, and vigorous root mass are inherently necessary conditions and very important cultivation concept.

=To use of complete non-toxic, miraculously organic NATURAL PESTICIDES-

LinkNoPests-PLU\$ + Link-Algae + Link-Chitosan + Link-Bta.

On the occasion of the rural gradually manpower shortage, high labor costs, plus a variety of diseases and pests, climate anomalies, caused farmers lose confidence on agricultural investment. The introduction of these products, farmers would be the entry turnaround, it allows farmers to restore confidence, and then agricultural products get a harvest yield.

Strongly recommend our HOTTEST products.

We are knowing about what you have want.

We are solving what you want to be solved.

Why The Chain Reaction Agent

Why is  $1+1 \neq 2$  ?

The decoder for plants to grow robustly i.e. GPL-37 Chain Reaction Agent.

A single nutrient dosage with the efficacy of multiplier efficacy

Do you believe it?

The most instances for almost various fertilizers, they have 3% to 15% increases in nutrient uptake in the plants on its own. However when combined with our Chain Reaction GPL-37 Agent, it was 39% to 52% uptake which was amazing.

Your actual testing and experiment will be most important and will have sufficient proof to verify its efficacy and benefits.

Proof of the pudding is that you ate it.

(Evidence is better than theory.)

Now it is a proper timing to promote the miracle organic stimulant / **NATURAL FERTILIZER** – GPL-37 and LINK-SOIL. Those who are prepared will always be winners.

## PLAY TO WIN !! THE SAVIOR OF PLANT !!

ORGANIC STIMULANT OF CHAIN REACTION AGENT for Crop:  
GPL-37 CONDENSED SOLUTION / **NATURAL FERTILIZER**

The product is meet EU and UK standard (attached CERTIFICATE of Enhance Organic Stimulant-OF&G Regn No. UKE0540 in U.K.) (**Brand: Enhance Organic Stimulant**). It is also very suitable application on the hydroponics farms.

We are the certified ISO 9001:2000 company in Taiwan, our group always develops the super products of new type which all are a best booming sale with high profits. In this time, we recommended you carefully that it is the world first systematic **ORGANIC STIMULANT-THE CHAIN REACTION AGENT:G.P.L.-37**. We are looking for exclusive importer or distributor for the same in your country. If you are not dealing in such product, you may send us reference of the person who is dealing in fertilizers. THANKS.

### WHAT IS THE CHAIN REACTION GPL-37 AGENT?

**GPL-37 is a Commander-in-chief of which all nutrient factors and fertilizers, to increase 39% to 52% in nutrient uptake.**

As of today, **GPL-37 Chain Reaction Agent is the global first unique complex organic fertilizer**. Its main effects are to activate the inter-chain reaction of the chief contents of the product creating the effects needed. Even the nutrition absorbed from through the leaf surface and root may take part in the chain reaction by means of GPL-37. In facts, **GPL-37 is a guide of which all nutrient factors and fertilizers (included farmers used various fertilizers such as NPK, Urea)**, it is able to lead and support the all nutrients to join the process of chain reaction, to enrich your Plant Growth Promoters. therefore, **if you are the manufactory of any kinds of fertilizer, you may consider to combine and mix with our GPL-37 as Adjuvant, for which effect improvements and increased some more functions toward your various fertilizers (liquid and granular are available).** **The chain reaction process ranges from INFILTRATION, CONVERSION, CIRCULATION, TRANSFER, PRODUCTION, CREATION, REPLACEMENT, STIMULATION, MULTIPLICATION, CATALYSIS and RESTORATION** in combined effects.

NOTE: **GPL-37 is made from NATURAL VEGETABLE EXTRACTS** and its composition as follows:

MAJOR MATERIAL:

G.P.L.-37 Chain Reaction Agent (Natural Vegetable Extracts).....75% (Dry basis)

### COMPOSITION:

**Organic Matter. 21.3%, N (2.7%); P (3ppm), K (14ppm), MgO (13ppm), Ca (290ppm), Fe (5ppm), Cu (0.4ppm), Mn (17ppm), Zn (20ppm)** and the thousands of polyamine and hormone-like (NOT hormone) of which extracting from natural vegetable, the each contents below  $10^{-8}$  to  $10^{-10}$ , these ingredients has so many biological activities so that reach many kinds of efficacy on various stage of growth of plant. **It is not only the complete organic plant tonic and also the chain reaction agent.**

### THE DISTINCTIVE EFFECTS OF THE CHAIN REACTION AGENT:

**A single nutrient with the efficacy of multiplier effect (Why is  $1+1 \neq 2$  ?)**

(pls peruse "**Advantage of Chain Reaction Agent - GPL-37**" as attachment.)

#### 1). **Mobility** :

Effects of this agent are focused on various stage of growth of a plant by transferring the elements accordingly into the plant in mobility. To promote the rapid growth of plant and balanced growth with multiple reactions as a result of the aid and activation of GPL-37 chain reactions.

#### 2). **Systematization** :

Because this agent is capable of providing a series of special effects on any part of the crops with chain reactions and mobility - **which can promote germination, flowering, flower handle straight, prevent fruit drop, fruit hypertrophy, fruit rate, to better coloring and greatly improve yield and quality, etc.** It can also **to stunt the fresh shoot overgrowth of vine and jatropa, pistachio, macadamia, etc. and could increase branches emerge from earlier node, always do not need to prune and save the labor wage.** Frequently application of the multi-effect agent is to be rewarded with the magic results. It has a condensed solution, which yields earlier maturing and harvesting time also increase water holding capacity. In addition, it helps reduce use of other compound fertilizers.

3). **Rapid Absorption, Conspicuously Effective, Perfect Absorption.** The **GPL-37**, it uses a small dosage, about **dilute 2,000 parts to 3,000 parts / 34ml to 50ml in 100 liters water, and dosage about 200ml to 240ml / per ha. / each**

time. **Yield increase for 20% to 200%**. It is a real cost-effective and outstanding crop nutrient / stimulator.

## **The unique report of GPL-37 Chain Reaction ORGANIC stimulant Fertilizer to regulate plant specific genes**

After years of tracking and research, our experts/engineers have discovered the miracle functions of the regulation of plant specific genes of the GPL-37 Chain Reaction Stimulant Fertilizer.

The innovative technology of GPL-37 Chain Reaction Stimulant Fertilizer is able to regulate plant specific genes, develop plant growth regulators, growth stimulants, and high-efficiency fertilizers, which can increase crop yield, quality and added value.

To regulate the specific genes that affect the production value factors such as the yield or flavor of the plant, it is a good competitive niche to grow high-altitude tea at a low altitude or to develop high-priced flavored coffee, and even extend the harvest period or earlier harvest period.

Up to now, **GPL-37** Condensed Solution / **NATURAL FERTILIZERS** is the best and unique crops **ORGANIC STIMULANT** (technically not only a fertilizer but also the chain reaction agent) in world, absolutely has large market demand. We have pleasure to introduce ourselves as an exporter of the first unique fertilizer in world; it is our honor and duty that we recommended this product to your esteem company. We shall thank you to please let us know this product of interest to you, with quantities, packing, shipment required, etc., to enable us to send you our offers, and technical data / information, etc. to our mutual interesting.

Re: **LINK-SOIL (SOIL IMPROVER)=WASTELAND INTO FERTILE FIELDS = GERMINATION treatment of SEEDS, use LINK-SOIL to soak seeds.**

We also supply a newest solution for treating saline-alkaline soils, if you are interested in, pls inform us. **LINK-SOIL** summary attached (**LINK-SOIL(item#NG-9810)-What the plant needs.doc**).

Re: **LinkNoPests-PLUS + Link-Algae + Link-Chitosan + Link-Bta. (NATURAL PESTICIDES)** Organic biological natural non-toxic formulation, very excellent efficacy to kill most pests and prevents bacteria (pathogenic bacteria) occurrence.

Re: **LinkNoWeed (Item#GU-10804) INNOVATION NATURAL HERBICIDE**  
**The mechanism and effect of LinkNoWeed:**

It can effectively inhibit the photosynthesis of weeds and destroy chlorophyll, block the nutrients necessary for plant growth and development, and lead to the phenomenon of yellow leaves and leaves.

If you could apply **LINK-SOIL** for soil treatment in advance, and then apply **Link-ROOT** & **Link-FLORA** & **Link-N.N.** and collocate our magical **GPL-37 CONDENSED SOLUTION** (chain reaction GPL-37 organic growth regulator, the Commander-in-chief in plant nutrition circles) etc. **NATURAL Fertilizers** for foliar sprayings and as per our S.O.P. method, plus to use **LinkNoPests-PLUS + Link-Algae + Link-Chitosan + Link-Bta.** etc. **NATURAL Pesticides**, we assure that your crops will be absolutely getting the 100% total victory and HOME RUN.

I appreciate your time and we are now looking forward to your early response and then send the technical data / information for your perusal. Do not let this opportunity pass you by. Assuring you of our best services at all times.

**GROW IN A BETTER TOMORROW!!**
