Material Safety Data Sheet

1. PRODUCT NAME: LinkNoWeed® SP (item#GU-11207A)

Product use: dilute with water and spray on weeds.

INNOVATION NATURAL HERBICIDE

(Be classified in a defoliant / desiccant Herbicide or Soil Treatment)

2. COMPOSITION/INFORMATION ON INGREDIENTS

This product is to be considered as a substance in conformance to EC directives
Registration ingredients: Sodium Chlorate, and other ingredients.

Composition / Information on Ingredients:
 = Guaranty Active Ingredients (A.I.):

Active Ingredients Name	%w/w	CAS#	EINECS#	ICSC#	Hazard classification	Danger warning
Sodium Chlorate	23%	7775-09-09	----	----	No	Green Warning
Inert Ingredients	77%	----	----	----	No	No

3. HAZARDS IDENTIFICATION

Soluble-Water White Powder.

Hazardous Substance Identification System (HMIS) Level: Health=0 Fire=0 Body hazard=0

NFPA rating: Health=0 Fire=0 Instability=0

(0=minimum hazard, 1=minor hazard, 2=moderate hazard, 3=Severe hazard, 4=Extremely harmful)

Emergency Overview: This product is mainly used in the plant surface mixed with water spray. It is expected to contact the hair and skin. No abnormal hazards are expected.

European Union Classification (1999/45/EC): Not classified as a hazardous substance or preparation.
 The subject matter is not subject to the directives for classification and labeling of hazardous substances. (1999/45/EC)
 US Occupational Safety and Health Administration classification (29CFR1910.1200): Non-hazardous
 Globally Harmonized System of Classification and Labelling of Chemicals (GHS) Classification: Non-hazardous
 EU grade and danger phrases as a reference

Xi irritant
 R36/38 Irritating to eyes and skin

Signal word: Green Warning

4. FIRST AID MEASURES

Inhalation: Move to fresh air. If you have a cough, shortness of breath or other breathing problems, consult your doctor.

Skin contact: Wash with water. This product is intended for use on plants. If redness, swelling, itching or burning occurs, then consult a doctor.

Eye contact: Rinse immediately with plenty of water, including inside the eyelids, for at least 15 minutes. Get medical attention if irritation persists.

Swallow: Call your doctor or poison control center immediately. Do not induce vomiting by hand. Drink 1 cup or 2 cups of water. Never give any food to an unconscious patient.

5. FIRE-FIGHTING MEASURES

Suitable extinguishing media: water, water mist, fog (flooding amounts).

Unsuitable extinguishing media: DO NOT use dry chemical fire extinguishing agents containing ammonium compounds (such as some A:B:C agents), since an explosive compound can be formed. DO NOT use carbon dioxide, dry chemical powder or other extinguishing agents that smother flames, since they are not effective in extinguishing fires involving oxidizers.

Specific hazards arising from the chemical: Strong oxidizer – contact with other material may cause fire or explosion; strong oxidizer.

Special protective equipment and precautions for firefighters: Firefighters must use standard protective equipment including flame retardant coat, helmet with face shield, gloves, rubber boots, and in enclosed spaces, SCBA. Avoid use of leather products.

Firefighting equipment/instructions: In case of fire: Evacuate area. Fight fire remotely due to the risk of explosion. In the event of fire, cool tanks with water spray. Move containers from fire area if you can do so without risk. For massive fire in cargo area, use unmanned hose holder or monitor nozzles, if possible. If not, withdraw and let fire burn out. Do not allow run-off from firefighting to enter drains or water courses. Dike for water control.

Specific methods: Water is the only effective extinguishing media for fires involving sodium chlorate. Cool containers exposed to flames with water until well after the fire is out.

General fire hazards: May cause fire or explosion; strong oxidizer.

Hazardous combustion products: Pure sodium chlorate decomposes explosively under intense fire conditions. It initially decomposes to sodium perchlorate and begins to liberate oxygen at about 265°C. Besides oxygen, other compounds formed in a fire include chlorine, hydrogen chloride and sodium oxide.

6. ACCIDENTAL LEAKAGE MEASURES

Excess material is removed and placed in a container for recycling, reuse or disposal. Follow all central and local regulation.

7. HANDLING AND STORAGE

Avoid contact with the eyes. Avoid sparks, flames and overheating.

Handling: Wash exposed skin surfaces before smoking, drinking or eating.

Fire and explosion: No specific recommendations.

Storage requirements: Store in a cool, dry, well-ventilated place. Recommended storage temperature is 40°F - 100°F (5°C – 37°C).

Other information: Keep container tightly closed and dry when not in use.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

The total mixture currently does not have an exposure limit for this product internationally. For the latest limits, please contact your local authorities.

MSDS LinkNoWeed® SP (item#GU-11207A)

Engineering controls	No specific recommendations
Exposure limits	No exposure limits have been established for this material
Personal protection	
Respiratory	Use appropriate U.S. NIOSH/MSHA, approved equipment.
Hand	Wear suitable gloves
Eye	Wear eye/face protection
Skin and body	The usual precautions for handling chemicals should be observed For large-scale processing, it is recommended to wash your hands frequently and use general body protective clothing, safety goggles and gloves as a good industrial hygiene regulation.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance & Odor: Soluble Powder & Odorless
Boiling point/range: >300°C
Melting point/range: Decomposes without melting
Specific gravity (water = 1): 0.66 ± 0.01
Vapor pressure: No
Vapor density (air = 1): No
Solubility in water: Complete
pH value: 6.5±0.2
Separation factor (n-octanol/water): Do not have
Evaporation rate (butyl acetate = 1): No
Volatile volume percentage (%): Do not have
Volatile Organic Carbon Compound (VOC) (g/L): No
Flash point: >218°C
Freezing point: No
Flammability limit in air % (volume):
LEL (lower limit): not applicable UEL (upper limit): not applicable
Water/oil partition coefficient: Not applicable
Viscosity: not relevant
Auto ignition temperature: not determined
Explosive properties: not relevant
Oxidizing properties: not applicable
Other information: decomposition temperature: >300°C

10. STABILITY AND REACTIVITY

Stability: Stable under recommended storage and handling conditions (see section 7)
Conditions to avoid: none known
Materials to avoid: none known
Hazardous decomposition products: carbon monoxide, carbon dioxide.

11. TOXICOLOGICAL INFORMATION

Inhalation: no obvious symptoms
Skin contact: The skin test did not show the possibility of irritation to human skin. Not expected to be a sensitizer.
Eye contact: May cause mild irritation.
Edible: Not intended for consumption, but no abnormal hazard is expected.
Chronic toxicity: currently unknown.
Deteriorating health due to exposure: currently unknown.
Carcinogenicity data: This product has no components by the International Agency for Research on Cancer (IARC), the National Toxicology Program (NTP), the US Occupational Safety and Health Administration (US OSHA) or the European Union Directive (67/548/EEC) is classified as a carcinogen.
Reproductive toxicity: currently unknown.
Acute toxicity value: currently unknown.

12. ECOLOGICAL INFORMATION

MSDS LinkNoWeed® SP (item#GU-11207A)

No experimental ecological data are available on the preparation as such. From structurally related products the following may be expected. Degradation Biotic: Not readily biodegradable.

13. DISPOSAL CONSIDERATIONS

Product: According to local regulations.
Contaminated packaging: No specific recommendations.

14. TRANSPORT INFORMATION

DOT Shipping Class: 70

Land transport

ADR class	not restricted	ADR item number	not relevant
RID class	not restricted	RID item number	not relevant
Hazard Identification	none	Substance Identification	none
TREM-Card	not relevant	UN number	not relevant
Proper shipping name	not relevant

15. REGULATORY INFORMATION

US regulations

MSDS LinkNoWeed® SP (item#GU-11207A)

US Environmental Protection Agency Toxic Substances Control Act (TSCA): All components of this product are listed in the TSCA catalog or exempt from TSCA.

Super Fund Amendment and Reauthorization Act (SARA) Section 302 Chemicals listed: None

SARA Section 311/312 Classification of Hazardous Materials: Not applicable

SARA313 This product contains SARA Section 313 (40 CFR 372) The following chemicals required for annual emissions reports:
None

California Proposal 65: This product does not contain the chemicals listed in the 1986 Drinking Water and Toxic Substances Enforcement Act.

International regulations

Canadian Workplace Hazardous Materials Information System (WHMIS) Classification: Not a regulated product.

This product has been classified according to the Hazardous Substances Standards of the Controlled Product Regulations (CPR). This Material Safety Data Sheet contains all the information required by CPR.

EU label: none

16. OTHER INFORMATION

According to Kimberly-Clark', the information contained in this article is true and correct. However, we make no warranties, express or implied. Nothing in this document should be construed as a violation of an existing patent or a violation of any law or regulation. The user is solely responsible for the applicability of the final judgment.

It is hereby certified that this document shows the contents of Material Safety Data Sheet (MSDS) which be edited as per the Act of Pesticides Management Regulation, Council of Agriculture, Executive Yuan, Taiwan.
