Subject: INFORMATION REGARDING THE APPLIANCE OF LINK

GROWING - UP INTERNATIONAL PRODUCTS

Attention: Jin - Sheng Chen

Reference: INFORMATION REGARDING THE APPLIANCE OF **LINK**

Santa Cruz de la Sierra, 04/13/2006

BOLIVIA

Dear Jin - Sheng Chen

I have to say that I do appreciate the information you are always sending to me regarding the appliance of **LINK** in different crops, this information is very important so as to show the client the effects of this fertilizer on these crops, effects that turn up to be good cash for the farmer.

What you now need is the information of what we have been doing here in **Bolivia,** specially in the sugar cane sector, I will gladly send you some pictures of the effects that this fertilizer **link** has over the plantation of the sugar cane in two different parts of the sugar cane plantation area, so that you can send these photos to all your clients all over the world, **never the less this year has been particularly rainy and some areas of the sugar cane were to be flooded.**

Due to the adversity of the climate, some sugar cane planters lost a few hectares of sugar cane

but what is really amazing is that the area where we used LINK, and got flooded too, resisted the flood and the plants stood still till now and still growing, at least we have proved to one of the possible clients that LINK is the solution for the fertilizing of this crop in particular, at the end of the period, I mean, when the harvest comes we are going to see the BRIX°, in other words we are going to see if the sugar content of the plant has been incremented, if this gets to happen, then we have the market for all of the sugar cane planters open for ever.

The same thing is going to happen with the soybean market, I have the feeling that this LINK solution is going to work on the LINOLEIC ACID of the crop, acid this very important in the feeding of humans and animals, most important for the nutritious part and structure.

OK Mr. Chen, I will be sending you some photos any moment, lets start with the sugar cane matter and then with the macadamia, and then with the soybean, and so on and so forth, this will be all for the moment, please let me wish you all the success in the world and please keep on selling the way you do. thank you very much for all the effort and good will you have had towards our company

Very Respectfully

Horacio Plaza - Ponte Sosa
