

The stories behind miracle GPL-37 Chain Reaction Stimulant

From 12% increase in nutrient uptake ratio became to 45% increase uptake ratio while combined with the Chain Reaction GPL-37 Stimulant.

Strongly confidence to recommend you to use our unique Chain Reaction Stimulant – GPL -37 to MIX / collocate with your any fertilizers.

Why The Chain Reaction Agent

Why is $1+1 \neq 2$?

A single nutrients with multiply effects

Do you believe it?

The most instances for almost various fertilizers, they have 3% to 15% increases maximum in nutrient uptake in the plants on its own. However when combined with our Chain Reaction **GPL-37 Agent**, it was 39% to 52% uptake which was amazing.

Your actual testing and experiment will be most important and will have sufficient proof to verify its efficacy and benefits.

The proof of the pudding is in the eating.

(Evidence is better than theory.)

=====CHAMPION PRODUCT=====DISTRIBUTOR WANTED=====

AQIS Permit No. IP11008205 (Australian Government, Department of Agriculture, Fisheries and Forestry)

U.K. Permit: OF&G Regn No.UKE0540

=====

**The product is meet EU and UK standard (Permit: OF&G Regn No.UKE0540 in U.K.).
It is also very suitable application on the hydroponics farms.**

Sub. **GPL-37 (technical grade) as ADJUVANT for any yourself fertilizers and USE yourself brand name**

GPL-37 is a guide of which all nutrient factors and fertilizers (included farmers used various fertilizers such as NPK, Urea, Humate), it is able to lead and support the all nutrients to join the process of chain reaction, therefore, **if you are the manufactory of any kinds of fertilizer, you may consider to combine and mix with our Technical Grade of GPL-37 (NOTE: the Technical Grade is named GPL-37, for which effect improvements and increased some more functions with boosting a high value and power more on your various fertilizers (liquid and granular are available).** The technical grade material is named **GPL-37 / item #HS-9412**, its major ingredient (100% G.P.L.-37 chain reaction agent), which could be combined and mixed with any your fertilizers and use yourself brand name, the combine method and percentage rate are your option and prepared by yourself as your requirements.

EXAMPLES in CANADA:

Dr. Mangan is a famous professional agricultural engineer in Canada and the whole Americas. The below experiment and trial is his expert conducts, they already test the genetic side and study into the range / field of the plant DNA. That is a very professional and advanced scientific trial, they are our important partner and very helpful to our organic fertilizer and products development.

Subject: Re: test and experiment for our miracle organic fertilizers - **GPL-37** and LINK-SOIL

Hi Jin

We did receive the box on tue last week. We just gave the first feeding in the trial on some small plants last Mon to start and will test to see if all the parts of the plants are reacting positively before we upscale as we do all the testing. I will keep you informed.

We have strict trials for Organic certified fertilizers and we need to make sure our SC Diagnostic testing with PCR and Gas Chrom all confirm findings before we upscale in the organic category.

Thank you for getting it to us and we will chat soon.

Regards

Dr Mangan

Hi Dr.Michael Mangan,

Many greetings and hope all are well with you.

Could you pls advise what your progress on our [GPL-37](#) and how about of your first feeding in the trial on some smal plants since Mid of July?

Also what is the results of SC Diagnostic testing with PCR and Gas Chrom?

Have a great day.

Jin-Sheng

Hi Jin

We are just about to start assay on all parts of the plants with and without our Organic fertilizer. I sense the phenotyping has increased now we need to se the genotyping to conclude. Give me 2 weeks and email me and I will have results. I sense that what I have invented will work well with your 2 products , I just need to confirm it all can be certified Organic to continue.

Thanks

Dr Mangan

Hello Dr. Mangan,

Greetings.

May I get your results of the genotyping? and your valued comments with sales intention in your territories?

Thanks and await your reply soon.

Hi Jin

Just back from the NorthAmerican conference and we discussed your product you sent us.

- 1- We did have 12% increase in nutrient uptake in the tomatoe plants on its own.
- 2- However when combined with our GrowBigTeaTM it was 45% uptake which was amazing.

So we have applied for secondary testing and have been excepted to commence greenhouse testing with your product combined with ours under artificial light to see if we can obtain the same or better results.

As for the genetic side of the test we wont be completed for six months since our team has to complete the wet chemistry test before the geno and phenotyping is completed. Also This data will be kept very confidential due to the plant DNA we work on. But I will let you know roughly and we can then start the next part in our application tot he government to permit us to import for commercial use and reselling in our

product lines.

You will need to share the manufacture best price so we can make the market price as well.

When we re diswtribute our GrowBigTea TM to Asia then we can also explore the possibilities for you to produce for us there to reduce the shipping cost for us as well. Since it is likely we will have a combination product all certified Organic by our Canadian and Californian standards.

We will discuss this in 4-6 weeks possibly earlier.

Thank you

Dr.Mangan

Subject: Re: test and experiment for our miracle organic fertilizers - **GPL-37** and LINK-SOIL

Hello Dr. Mangan,

Many greetings and with best wishes to you and your family.

As to your valued comments, our suugestion and explanation as below:

1- We did have 12% increase in nutrient uptake in the tomatoe plants on its own.

We suggest you still need to test our product / **GPL-37**, and **GPL-37** plus GrowBigTeaTM in separately, and apply them from the first apply the **GPL-37** and **GPL-37** plus GrowBigTeaTM after planting till the final application and yield harvest comparison and to follow up its final results and contrast the final results. I believe that you will get the most signification results and how to promote the products **GPL-37**, and **GPL-37** plus GrowBigTeaTM.

2- However when combined with our GrowBigTeaTM it was 45% uptake which was amazing.

Why the effects of **GPL-37** were so miracle and specialty? please refer to our **GPL-37** recommendation letter (**GPL-37** (item#HS-9412)-recomn.doc) from our attachment.

In facts **GPL-37** is a guide of which all nutrient factors and fertilizers (included farmers used various fertilizers such as NPK, Urea), it is able to lead and support the all nutrients to join the process of chain reaction. It can be directly used fertilizer in the field or the raw material of NPK/NP compound or blended fertilizer, therefore, if you are the manufactory of any kinds of fertilizer, you may consider

to combine and mix with our **GPL-37** as Adjuvant, for which effect improvements and increased some more functions with boosting a high value and power more on your various fertilizers (liquid and granular are available). The chain reaction process ranges from INFILTRATION, TRANSFER, CIRCULATION, CONVERSION, PRODUCTION, CREATION, REPLACEMENT, STIMULATION, MULTIPLICATION, CATALYSIS and RESTORATION in combined effects.

Perhaps the explanation is not very clear and very mysterious. These are often the period of observation and tracking actual results. In fact, today's technology is so developed for nature stuff, objects have very many events can not understand and know even go verify.

Could you please let us know what is happen from your second test results? and what is the test results of the genetic side?

ALSO INFORM US WHAT WILL BE YOUR NEXT PROGRAMS AND PROPOSAL?

Many thanks for your best attention, and awaiting your good news.
